

Technical Rider : Marcus Friedeberg

Hello! Here is my manageable rider: I usually bring everything myself, including the Mic-stand, and wire it up.

I use my own mics (Sure SM 58 and Sennheiser e 945). The instrument mix is preset (saves time!) and is supplied with 2 jack cables as a stereo sum. The Vocal-Channel with the e945 comes separately.

Backdrop 2x2m

FoH	Instrument	Output:
Channel 1	Vocal SH e945 via TCHelicon Voc FX	XLR
Channel 2	Summe Loopstation links	DI (is needed)
Channel 3	Summe loopstation rechts	DI (is needed)

As a guideline for the sound of the stereo signal, you can best focus on the acoustic guitar. If that sounds good, the rest of the sum usually fits too. All vocal effects come from the stage. Reference for overall sound: <https://www.youtube.com/watch?v=HX-zj6IYKjU>

Thank you for taking the time to read the Rider. I'm already looking forward to working with you! My telephone number for queries: +491713413097

With best Grooves,

Marcus Friedeberg
